

## Computer-Based Exams In Your School?

The future is here, don't be left behind!

### EasiPREP CBT School Network Edition: Take Your School to the Next Level

EasiPREP CBT School Network Edition allows schools to create and administer their own computer-based tests and exams using their own questions and on their own school computer network or computer lab. It is also bundled with over 24,000 questions and answers across 13 subjects for JAMB UTME and WAEC & NECO SSCE that students can practice and prepare with and which can be used to test and examine the students.

EasiPREP CBT School Network Edition offers many features which make it unique and make it ideal for exam preparation and administration, such as:

- Automatic shuffling of questions and answers to prevent or eliminate cheating even when students sit beside each other
- **Support for diagrams and equations in both questions and answer options, for mathematics and science subjects**
- Support for multiple question types including true or false, yes or no and multiple choice questions with up to 5 options
- **Students can skip questions, come back and review questions just like in normal examinations and tests**
- Results of tests and exams are stored on the central server and can be exported to Microsoft Excel and CSV formats
- **Support for Teacher console where teachers can easily set and import exam questions into the system**
- Support for setting questions using normal word processors like MS Word, WordPad or Notepad and importing these questions automatically into the EasiPREP CBT Server

JAMB is already offering computer-based exams because of its obvious benefits for same day results while tertiary institutions are increasingly adopting computer-based Post UTME screening and some even for internal examinations.

Smart schools are also taking the decision and not waiting to be the last to join the CBT band-wagon with its obvious benefits.

### THE FACTS

**38%** of candidates freely chose CBT option instead of PPT in JAMB UTME for 2014

**100%** of candidates now take JAMB UTME on computers since 2015

**70%** of tertiary institutions plan to or already running Post UTME exams on computers

### THE BENEFITS

- ✚ Cost savings in exam and test materials
- ✚ Time savings in marking and grading tests and exams
- ✚ Instant exam and test results with audit logs
- ✚ Eradication of examination malpractices
- ✚ No missing results or grading errors or influenced grading
- ✚ Ideal for CA Tests, Mock Exams, Staff Assessments, Screening Tests and many more...
- ✚ Bundled with 24,000+ questions & answers in 13 subjects across JAMB UTME, WAEC/NECO SSCE

# How EasiPREP CBT School Network Edition Works

## STEP 1: EXAM CREATION

Exam questions can be created from the EasiPREP CBT Remote Console for teachers from the teacher's computer on the network directly into the CBT Server. Questions created with Microsoft Word, WordPad or Notepad can also be imported into the CBT Server through the Remote Console by teachers.

## STEP 2: EXAM DELIVERY

Students can login with their unique usernames that have been created on the CBT Server and then take exams assigned to them from any computer in the school lab. Students can skip and review questions just like normal exam. The system enforces the exam time for students.

TEACHER'S COMPUTER

STUDENTS' COMPUTERS OR SCHOOL LAB COMPUTERS

ADMINISTRATOR'S COMPUTER

EASIPREP CBT SERVER COMPUTER

RECORD OF ACTIVITIES ON FOR ACCOUNTABILITY PURPOSES

ACCESS IS CONTROLLED GENERALLY WITH UNIQUE USERNAMES & PASSWORDS

ADMINISTRATOR CAN ACCESS THE SERVER FROM ANY COMPUTER ON THE NETWORK

## STEP 3: EXAM RESULTS

The administrator can access the CBT Server using the Remote Console to export results of student exams and tests into Microsoft Excel or CSV format. The system offers extensive information apart from scores, such as time spent on each question, question answered correctly or wrongly and many more.

## BUNDLED EXAMS

The CBT Server comes pre-bundled with over 24,000 questions across 13 subjects for JAMB UTME and WAEC & NECO SSCE exams which students can take or practice with and be scored just like any normal exam from any computer on the school network or school computer lab.
